DOB 24.04.1990

Curriculum Vitae

A young professional with a desire to pursue a career in software development. Self-taught and still learning, currently teaching myself **Python, SQL** with competencies in parsing and working with **XML, JSON** and **HTML**.

Examples of projects/source code can be found on my github page - https://github.com/ccdle12.

My time is spent working through a Python Course and personal projects such as web scraping, transferring information into SQL databases, creating games and fine tuning problem solving skills on www.codewars.com.

I've also developed interests in Computer Science and the theoretical side of programming. Specifically, studying Algorithms. At the moment, my understanding of Algorithms is rudimentary but it's been hugely beneficial for me in understanding strategies such as Selection Sort and Merge Sort to think about and create more succinct code as well as solve problems quicker.

I am British citizen and passport holder, eligible to work in the UK. I'm currently living overseas but I am relocating to the UK on July 16th 2016, and I am very interested in exploring potential job opportunities as a trainee/junior developer.

Skills

Python
SQL
XML
JSON
Word Press
Cargo-Wise – EDI

Education
